**CASI MOBILE APP
SUBSCRIPTION**

Gets you access to over 150 trained and armed responders anytime.

CASI app now available on

Call all stations immediately

Once activated the CASI app broadcasts your location to all the nearest responding partners as well as our 24 hour Command Centre that can track you in real time and assist the responder by providing them with all the required information. Our armed responders will be notified of nearby emergencies as well as be navigated to the location of the smartphone that has activated the panic. On arrival the completion will be validated with a unique code.

Safety at the touch of a button

The unique wireless panic button works within 30 meters or your smartphone, offering direct access to security, no matter what your location or situation.

Safety at your fingertips

Make use of the smartwatch extension to activate a panic in a situation where your phone is not within direct use. You remain informed of the expected arrival based on the responder's live location

CASI

CASI is the all-new personalised security app that comes with the country's first mobile panic button and country-wide coverage.
